

SmartBar LT

Your Bar. Smarter. Today.

LET'S TALK

WHAT IS SMARTBAR LT?

BeerBoard designed **SmartBar LT** to be fast and flexible. It has all the power of its industry-leading technology, the same user-friendly platform, but no hardware to install. Start making data-driven decisions today.

This is smart. **SmartBar LT**.

BeerBoard's tech gives you real-time data and insights. Today.

PMIX data pulled from your POS provides real-time performance via mobile or web portal. Actionable reporting leads to fact-based decisions and your best profits.

Extract Data & Trends

Access real-time store performance and top styles, brands and SKUs for both draft and package. You can track the latest trends within your market, region or nationally.

Automated Ordering

Place orders based on your usage and trends. Managers review quantities and add new products (if needed) before approval. Order is sent immediately to distributor via email and/or EDI.

Contactless Menus

Digital, contactless menus are generated automatically for your draft, bottle/cans and wine lists. Keep customers and staff safe while also eliminating print costs.

Merchandise Effectively

Merchandise effectively in-store with BeerBoardTV and BeerPages (easy access to your menus on mobile, web or QR code). Eliminate lost sales from out-of-date menus.
